ABSTRACT

Join us for a demonstration of the latest simulation modeling and analysis capabilities in FlexSim 2021. Significant recent developments have enabled our users to execute even the most complex digital twin projects, and we're excited to show several examples of how FlexSim is being used as a pillar of Industry 4.0 initiatives. Combined with our recent advancements in agent-based modeling and powerful tools for warehousing and manufacturing, you'll discover why FlexSim is the complete package for any simulation modeling application.
